

The Gardeners

With our 125 team members, we focus on our core competencies in development, project implementation, maintenance and sales.

We endeavor to always maintain cost leadership by creating as little overhead as possible. This focus is reflected in our personnel structure, which places 53 percent of the ECT team in the technical areas (development, project management and product management), 22 percent in technical customer service (7 x 24 on-site engineering services), 18 percent in sales / presales and only 7 percent in administration.
